It passed the test of practice, and with 1z0-1032-22 Latest Questions the best quality, You can choose the device you feel convenient at any time, Oracle Responsys Marketing Platform Cloud Service enhances intellectual skills, Superwszywka [1z0-1032-22](#) has not been able to access the Internet for an extended period of time.

1z0-1032-22 Preparation Materials and 1z0-1032-22 Study Guide: Oracle Responsys Marketing Platform 2022 Implementation Professional Real Dumps
You need high quality content, and practicing material to get successful in Oracle Responsys Marketing Platform Cloud Service, We spend much time & money on improving the quality of 1z0-1032-22 exam cram and better service satisfaction.

More and more people have bought our 1z0-1032-22 guide questions in the past years, We are famous for the high pass rate of our 1z0-1032-22 exam materials, that's why many old customers trust us and choose us directly before they have 1z0-1032-22 exams to attend.

It is the unique the 1z0-1032-22 Testing Engine that provides you tests comprising the 1z0-1032-22 latest questions, As we all know Credit Card is the safe, faster and widely used all over the world.

Our 1z0-1032-22 exam materials successfully solve this problem for them.

NEW QUESTION: 1

SIMULATION

Click to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar.

When you are finished performing all the tasks, click the 'Next' button.

Note that you cannot return to the lab once you click the 'Next' button. Scoring occur in the background while you complete the rest of the exam.

Overview

The following section of the exam is a lab. In this section,

you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab

You may start the lab by clicking the Next button.

You plan to host several secured websites on Web01.

You need to allow HTTPS over TCP port 443 to Web01 and to prevent HTTP over TCP port 80 to Web01.

What should you do from the Azure portal?

Answer:

Explanation:

See explanation below.

Explanation

You can filter network traffic to and from Azure resources in an Azure virtual network with a network security group. A network security group contains security rules that allow or deny inbound network traffic to, or outbound network traffic from, several types of Azure resources.

A network security group contains security rules that allow or deny inbound network traffic to, or outbound network traffic from, several types of Azure resources.

Step A: Create a network security group

A1. Search for and select the resource group for the VM, choose Add, then search for and select Network security group.

A2. Select Create.

The Create network security group window opens.

A3. Create a network security group

Enter a name for your network security group.

Select or create a resource group, then select a location.

A4. Select Create to create the network security group.

Step B: Create an inbound security rule to allows HTTPS over TCP port 443 B1. Select your new network security group.

B2. Select Inbound security rules, then select Add.

B3. Add inbound rule

B4. Select Advanced.

From the drop-down menu, select HTTPS.

You can also verify by clicking Custom and selecting TCP port, and 443.

B5. Select Add to create the rule.

Repeat step B2-B5 to deny TCP port 80

B6. Select Inbound security rules, then select Add.

B7. Add inbound rule

B8. Select Advanced.

Clicking Custom and selecting TCP port, and 80.

B9. Select Deny.

Step C: Associate your network security group with a subnet
Your final step is to associate your network security group with a subnet or a specific network interface.

C1. In the Search resources, services, and docs box at the top of the portal, begin typing Web01. When the Web01 VM appears in the search results, select it.

C2. Under SETTINGS, select Networking. Select Configure the application security groups, select the Security Group you created in Step A, and then select Save, as shown in the following picture:
