And our 1z0-1066-22 exam questions won't let you down.

**NEW QUESTION: 1**

An engineer is planning for a 24 Mbps data rate for a new installation. What is the coverage area from the AP if the environment and other factors are not taken into consideration?

- A. 100 feet
- B. 80 feet
- C. 150 feet
- D. 225 feet

**Answer: D**

Explanation:

Coverage (Cell Size)

Lower data rates can be demodulated across greater distances than higher data rates. This is because of the lower complexity encoding schemes - the signal can be understood at a lower SNR. Enable lower data rates in order to increase the effective range of the AP; disable the lower data rates in order to decrease the effective range of the AP.

Figure 16: Coverage (Cell Size)

**NEW QUESTION: 2**

You have a Microsoft 365 subscription.

You have the devices shown in the following table.

You need to onboard the devices to Windows Defender Advanced Threat Protection (ATP). The solution must avoid installing software on the devices whenever possible.

Which onboarding method should you use for each operating system? To answer, drag the appropriate methods to the correct operating systems. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**
