You have an Azure Service Bus.
You create a queue named Queue1. Queue1 is configured as shown
in the following exhibit.

Use the drop-down menus to select the answer choice that
completes each statement based on the information presented in
the graphic.
NOTE: Each correct selection is worth one point.

Answer:
Explanation:

Explanation:
Box 1: retained until manually deleted
Since by default PeekLock shall be enabled in Queue, so it will
move to DeadLetter after 2hours and stays there until manually
deleted. Messages in the dead letter queue should be deleted
manually.
Box 2: deleted immediately
Once a message is pulled, it will be deleted immediately. It
does not make sense to keep the message further 5 minutes
"locked" in the queue. Locking the message makes sense, for the
case, when processing the message from a receiver, to lock the
message, to avoid processing/receiving the message
simultaneously by another receiver.
The receiving client initiates settlement of a received message
with a positive acknowledgment when it calls Complete at the
API level. This indicates to the broker that the message has
been successfully processed and the message is removed from the
queue or subscription.
