Our company has the highly authoritative and experienced team.

**NEW QUESTION: 1**

Which of the following is a PRIMARY benefit associated with the management objective "managed strategy?"

- A. Desired value is delivered through a roadmap of incremental changes
- B. Service delivery is facilitated by adopting the latest technology innovations
- C. Effective communication channels are established across all levels of management

**Answer: A**

**NEW QUESTION: 2**

Your network contains a server named Server1 that has System Center 2012 Virtual Machine Manager (VMM) installed.

You plan to deploy a service named Service1. Service1 will contain three tiers. Each tier will contain 10 instances.

You need to configure the service template to ensure that when an application in Servicel is upgraded, Servicel remains available.

What should you configure for each tier?

- A. The minimum instance count
- B. The maximum instance count
- C. The preferred servicing order
- D. The number of upgrade domains
- E. The preferred deployment order

**Answer: D**

Explanation:

To minimize service interruptions when a tier is updated in-place, you can specify more than one upgrade domain in the tier properties. When the tier is updated, VMM updates the virtual machines in the tier according to the upgrade domain to which they belong. VMM upgrades one upgrade domain at a time, shutting down the virtual machines running within the upgrade domain, updating them, bringing them back online, and then moving on to the next upgrade domain. By shutting down only the virtual machines running within the current upgrade domain, VMM ensures that an upgrade takes place with the least possible impact to the running service.
