**NEW QUESTION: 3**

A corporate environment includes Exchange Server 2010 and Active Directory Domain Services (AD DS).

Client computers and the Exchange servers are joined to a single AD DS domain. When users connect to

Outlook Web App (OWA) from their client computers, they are prompted

for their credentials.

You need to recommend a solution that allows users to connect to OWA from their client computers without being prompted for credentials.

What should you recommend?

- A. integrated Windows authentication
- B. forms-based authentication
- C. Basic authentication
- D. Digest authentication for Windows domain servers

**Answer: A**

Explanation:

You can configure Integrated Windows authentication for Outlook Web App in Microsoft Exchange Server 2010. Integrated Windows authentication enables the server to authenticate users who are signed in to the network without prompting them for their user name and password and without transmitting information that isn't encrypted over the network.
