NEW QUESTION: 1
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are designing an Azure solution for a company that has four departments. Each department will deploy several Azure app services and Azure SQL databases.
You need to recommend a solution to report the costs for each department to deploy the app services and the databases. The solution must provide a consolidated view for cost reporting.
Solution: Create a separate resource group for each department. Place the resources for each department in its respective resource group.
Does this meet the goal?
A. Yes
B. No
Answer: B
Explanation:
Explanation
Instead create a resources group for each resource type. Assign tags to each resource group.
Note: Tags enable you to retrieve related resources from different resource groups. This approach is helpful when you need to organize resources for billing or management.

NEW QUESTION: 2

A. Option B
B. Option D
C. Option A
D. Option C
Answer: D
Explanation:
The AddNewStandAloneVM.ps1 script does the following:
- Takes the fully qualified domain name (FQDN) of the protected server and the
name of the protection group as input.
- Searches for the protected server and the protection group.
- Runs an inquiry on the server that is running Hyper-V and obtains the list of
unprotected virtual machines.
- Adds this list of virtual machines to the protection group.
- Saves the changes to the protection group and exits the procedure.
