- A. Update the bucket to be a Requester Pays bucket
- B. Create a bucket policy to require users to grant bucket-owner-full when uploading objects

Answer: B

Explanation

<https://aws.amazon.com/it/premiumsupport/knowledge-center/s3-bucket-owner-access/> By default, an S3 object is owned by the AWS account that uploaded it. This is true even when the bucket is owned by another account. To get access to the object, the object owner must explicitly grant you (the bucket owner) access. The object owner can grant the bucket owner full control of the object by updating the access control list (ACL) of the object. The object owner can update the ACL either during a put or copy operation, or after the object is added to the bucket.
