NEW QUESTION: 1Which two of the following statements correctly describe architecture and design? (Choose two.)**A.** The design is the basis for creating the architecture.**B.** The architecture shows building blocks and abstract capabilities of a system and the relationship between the individual components.**C.** The design shows concrete products, expected performance, and scalability options of a solution.**D.** The architecture includes a description of the best possible solution.**Answer: B,C**
Explanation:Explanation/Reference:Explanation:

NEW QUESTION: 2How would nonrepudiation be best classified as?
A. A compensating control**B.** A logical control**C.** A corrective control**D.** A preventive control**Answer: D**Explanation:Systems accountability depends on the ability to ensure that senders cannot deny sending information and that receivers cannot deny receiving it. Because the mechanisms implemented in nonrepudiation prevent the ability to successfully repudiate an action, it can be considered as a preventive control. Source: STONEBURNER, Gary, NIST Special Publication 800-33: Underlying Technical Models for Information Technology Security, National Institute of Standards and Technology, December 2001, page 7
