Or after many failures, will you still hold on to it, The aim of our AD0-E313 practice torrent is to help you successfully pass, High quality products.

NEW QUESTION: 1
Which statement about communication over failover interfaces is true?
A. User names, passwords, and preshared keys are encrypted by default when they are sent over the
failover and stateful failover interfaces, but other information is sent as clear text.
B. All information that is sent over the failover and stateful failover interfaces is sent as clear text by
default.
C. All information that is sent over the failover interface is sent as clear text, but the stateful failover link is
encrypted by default.
D. All information that is sent over the failover and stateful failover interfaces is encrypted by default.

Answer: B
Explanation:
Explanation
All information sent over the failover and Stateful Failover
links is sent in clear text unless you secure the
communication with a failover key. If the security appliance is
used to terminate VPN tunnels, this
information includes any usernames, passwords and preshared
keys used for establishing the tunnels.
Transmitting this sensitive data in clear text could pose a
significant security risk. We recommend securing the
failover communication with a failover key if you are using the
security appliance to terminate VPN tunnels.

NEW QUESTION: 3
A customer has asked you to design an EMC Avamar and Data
Domain integrated solution for their environment. As you review
the design for the Microsoft Exchange portion of the solution,
the customer would like you to explain the backup process.
How would you respond?
A. Exchange API, using a plug-in, sends all data directly to

the Data Domain appliance
B. Work order is received from the Avamar server backup data is
sent to the Data Domain appliance, and then metadata is sent to
the Avamar
C. Work order is sent from the Avamar Management Console to the
Exchange server, and then data and metadata are sent to the
Avamar system
D. Avamar instructs the Exchange server to send both backup
data and metadata to the Data Domain appliance
Answer: B
