**NEW QUESTION: 1**

Which statement about OTV-extended VLANs that have a SVI associated on the same physical Cisco Nexus 7000 is true?

- A. This setup requires use of F-Series line cards.
- B. Deployment of a dedicated OTV VDC is necessary.
- C. Traffic traversing the OTV domain must come from the default VDC.
- D. The Cisco Nexus 7000 must be the spanning-tree root for the VLAN.

**Answer: B**

**NEW QUESTION: 2**

Your network contains an Active Directory domain named contoso.com. Contoso.com contains a writable domain controller named DC1 and a read-only domain controller (RODC) named DC2. All domain controllers run Windows Server 2008 R2.

You need to install a new writable domain controller named DC3 in a remote site. The solution must minimize the amount of replication traffic that occurs during the installation of Active Directory Domain Services (AD DS) on DC3.

What should you do first?

- A. Run dcpromo.exe /createdcaccount on DC3.
- B. Run dcpromo.exe /adv on DC3.
- C. Run ntdsutil.exe on DC1.
- D. Run ntdsutil.exe on DC2.

**Answer: C**

Explanation:

We can run dcpromo.exe /adv on DC3 to install a new writable DC using the Install From Media (IFM) option to reduce replication traffic. But before we can do that, we have to create the installation media first. This is done with ntdsutil. This must be done on DC1 rather than DC2, as DC2 is a RODC.

"You can use the Ntdsutil.exe tool to create installation media for additional domain controllers that you are creating in a domain. By using the Install from Media (IFM) option, you can minimize the replication of directory data over the network. This helps you install additional domain controllers in remote sites more efficiently." (...) "You must use writeable domain controller installation media to install a writeable domain controller. You can create writeable domain controller installation media only on a writeable domain controller."

**NEW QUESTION: 3**

A university has network links between various locations. Where would a T3 connection be appropriate?

- A. Library laptop PC to Internet
- B. Computer lab PC to lab printer
- C. Main campus to a large satellite campus
- D. Server to network in the main campus server room

**Answer: D**

Explanation:

Explanation/Reference:

T3 lines are a common aggregation of 28 T1 circuits that yields 44.736 Mbps total network bandwidth .

Besides being used for long-distance traffic, T3 lines are also often used to build the core of a business network at its headquarters
