NEW QUESTION: 1

A user needs to test new software with existing data stored on a Celerra file system that has checkpoints. The Celerra administrator is asked to mount a SnapSure checkpoint from the file system to a different Data Mover.

Can the administrator fulfill this request? Why or why not?

- A. No, because a writeable snap is required for testing
- B. Yes, but only if the checkpoint is mounted read-only
- C. No, because the checkpoint relies on the PFS
- D. Yes, but the checkpoint cannot be restored to the PFS

Answer: C

Computer Telephony Integration Applications The following list contains descriptions of some Cisco CTI applications that are available:

Cisco IP Communicator-Cisco IP Communicator, a desktop application, turns your computer into a full-feature telephone with the added advantages of call tracking, desktop collaboration, and one-click dialing from online directories. You can also use Cisco IP Communicator in tandem with a Cisco Unified IP Phone to place, receive, and control calls from your desktop PC. All features function in both modes of operation.

Cisco Unified Communications Manager Auto-Attendant-The Cisco Unified Communications Manager Auto-Attendant application works with Cisco Unified Communications Manager to receive calls on specific telephone extensions and to allow the caller to choose an appropriate extension.

Cisco Web Dialer-Cisco Web Dialer, which is installed on a Cisco Unified Communications Manager server and is used in conjunction with Cisco Unified Communications Manager, allows Cisco Unified IP Phone users to make calls from web and desktop applications.

Cisco Unified Communications Manager Assistant-The Cisco Unified Communications Manager Assistant feature enables managers and their assistants to work together more effectively. The feature comprises a call-routing service, enhancements to phone capabilities for the manager and the assistant, and assistant console interfaces that are primarily used by the assistant.
