The RMAN LOG command line clause causes output issued during RMAN command compilation to be written to a log file and to standard output. E. RMAN error stacks should be read from the top down as that is the order in which errors are generated. F. Media Management messages for SBT devices are written to an Oracle trace file. Answer: A,F

NEW QUESTION: 3 Which two are true about using IAM to grant access to a Third-Party Account? (Choose two.) A. The role policy must specify the AWS Account ID to be accessed, "sts:AssumeRole" as action, and "sts:ExternalID" as condition. B. The role policy must specify the AWS Account ID to be accessed, "sts:AssumeRole" as action, and "sts:ExternalID" as condition. C. The role policy must specify the AWS Account ID to be accessed, "sts:AssumeRole" as action, and "sts:ExternalID" as condition. D. The role policy must specify the AWS Account ID to be accessed, "sts:AssumeRole" as action, and "sts:ExternalID" as condition. E. The role policy must specify the AWS Account ID to be accessed, "sts:AssumeRole" as action, and "sts:ExternalID" as condition. F. The role policy must specify the AWS Account ID to be accessed, "sts:AssumeRole" as action, and "sts:ExternalID" as condition. Answer: A,C,E

Explanation: Explanation Using IAM to grant access to a Third-Party Account 1) Create a role to provide access to the require resources 1.1) Create a role policy that specifies the AWS Account ID to be accessed, "sts:AssumeRole" as action, and "sts:ExternalID" as condition 1.2) Create a role using the role policy just created 1.3) Assign a resource policy to the role. This will provide permission to access resource ARNs to the auditor 2) Repeat steps 1 and 2 on all AWS accounts 3) The auditor connects to the AWS account AWS Security Token Service (STS). The auditor must provide its ExternalID from step 1.2, the ARN of the role he is trying to assume from step 1.3, sts:ExternalID 4) STS provide the auditor with temporary credentials that provides the role access from step 1 https://docs.aws.amazon.com/IAM/latest/UserGuide/id_roles_create_for-user_externalid.html https://aws.amazon.com/blogs/security/how-to-audit-cross-account-roles-using-aws-cloudtrail-and-amazon-cloud

NEW QUESTION: 4 CORRECT TEXT An administrator has issued the following command: grub-install --root-directory=/custom-grub /dev/sda In which directory will new configuration files be

found? (Provide the full directory path only without the filename)**Answer:** Explanation: /custom-grub/boot/grub/, /custom-grub/boot/grub
