NEW QUESTION: 1

SDN, a network architecture that allows for the separation of the control plane from the data plane, enabling centralized control and management of network resources. It is often used in conjunction with cloud computing and virtualization technologies.

- A. A network architecture that allows for the separation of the control plane from the data plane, enabling centralized control and management of network resources.
- B. A network architecture that allows for the separation of the control plane from the data plane, enabling distributed control and management of network resources.
- C. SDN, a network architecture that allows for the separation of the control plane from the data plane, enabling centralized control and management of network resources.
- D. SDN, a network architecture that allows for the separation of the control plane from the data plane, enabling distributed control and management of network resources.

Answer: C

NEW QUESTION: 2

Your customer is a government organization with strict security requirements. They want to expand their Layer 2 infrastructure between multiple buildings within the same campus environment. They also want to ensure that no unauthorized devices are connected between the switches in the different buildings. Which solution ensures data security in this environment?

- A. Use LACP on all inter-switch connections.
- B. Use MACsec on all inter-switch connections.
- C. Use PNAC on all inter-switch connections.
- D. Use LLDP on all inter-switch connections.

Answer: C

NEW QUESTION: 3

Web browser traffic is being intercepted by a FortiGate device. The traffic is being decrypted and inspected. The FortiGate device is configured with a public IP address and a virtual IP address. The virtual IP address is used to decrypt the traffic. Which IP address is used to decrypt the traffic?

- A. The public IP address of the FortiGate device.
- B. The internal IP address of the FortiGate device.
- C. remote user's public IP address
- D. The remote user's virtual IP address.

Answer: B

Explanation:

Explanation

Source IP seen by the remote resources is FortiGate's internal IP address and not the user's IP address
