Answer: B

NEW QUESTION: 2

You are a consultant for the HKU Company and you're helping them brand their online presence. You've worked with the company to create a video ad about their products. You've recommended that they participate in the Google Network. Beth, your client, asks how the placement tool, which you've recommended, will help them with their branding. What is a placement tool and how will it help the HKU Company?

- A.** The placement tool allows to edit the ads offline, make changes, propose changes, and add comments before the changes are uploaded and placed into the Google Network.
- B.** The placement tool will automate the placement of the video ad throughout the Google Net work.
- C.** The placement tool will help the HKU Company determine which partners in the Google Network don't accept non-text ads and filter out these partners from their placement choices.
- D.** The placement tool allows to choose where the video ads will be placed on the partner's we bsites.

Answer: C

NEW QUESTION: 3

Your network contains an Active Directory domain named contoso.com. You have an organizational unit (OU) named Secure that contains all servers. You install Microsoft Security Compliance Manager (SCM) 4.0 on a server named Server1. You need to export the SCM Pnnt Server Secunty baseline and to deploy the baseline to a server named Server2. What should you do? To answer, select the appropriate options in the answer area.

Answer:

Explanation:

Explanation

Format to use to export the baseline: GPO Backup (folder)
Tool to use to import the baseline: Group Policy Management

When the security settings is exported from SCM 4 in a GPO (folder) format, with a long GUID name

You have to import it to GPO by using "Group Policy Management", right-click the GPO and use "Import Settings" button

Do not confuse with security template .inf files. Only security template .INF file (which is a single file, not a folder) could be imported to a GPO by Group
