Interactive "Testing Engine" available for SAP SAP Information Management C-ARCIG-2302, .

NEW QUESTION: 1A. Option DB. Option CC. Option AD. Option B
Answer: AExplanation:ExplanationScope options are applied to any clients that obtain a lease within that particular scope. Active scope option types always apply to all computers obtaining a lease in a given scope unless they are overridden by class or reserved client settings for the option type.

Incorrect:Not A, not B. A superscope allows a DHCP server to provide leases from more than one scope to clients on a single physical network. It is not applicable here.Not C. If we configure the Server Options and set the DNS Servers then all DHCP clients would be assigned a DNS server.Reference: Managing DHCP Options
