NEW QUESTION: 1

Universal Containers has recently implemented an integration that is populating 50 custom fields on the account object. They would like these fields to be available to Managers for reporting but do not want them to clutter the page layouts. What should the Architect recommend as a solution?

- A. Grant the Managers access to the fields using a Role-Based Sharing Rule; leave them hidden on the page layout.
- B. Grant Managers access to the fields using Field-Level Security; do not add them to a page layout.
- C. Add the fields to a Custom Report; grant the Managers' Role access to the report folder.
- D. Add the fields to the Managers' Account Page Layout; mark the page layout section as Collapsed.

Answer: B

NEW QUESTION: 2

A system administrator has noticed that users change their password many times to cycle back to the original password when their passwords expire. Which of the following would BEST prevent this behavior?

- A. Assign users passwords based upon job role.
- B. Enforce a minimum password age policy.
- C. Prevent users from choosing their own passwords.
- D. Increase the password expiration time frame.

Answer: B

Explanation:

A minimum password age policy defines the period that a password must be used for before it can be changed.

Incorrect Answers:

- A. Assigning users passwords based upon job role is not a secure password solution.
- C. Preventing users from choosing their own passwords could make remembering passwords difficult. This could lead to a user having to record a generated password somewhere that is not secure.
- D. This will cause a password to be retained for a longer period.
