ã•"ã•"ã•^Answer: AExplanation:The default port for RDP is TCP
port 3389. A rule to permit RDP traffic must be created
automatically when you create your VM.Note on NSG-Subnet1:
Azure routes network traffic between all subnets in a virtual
network, by default.References:

NEW QUESTION: 4DRAG DROPYou manage 50 computers that run Windows 10 Enterprise. You have a Microsoft Azure RemoteApp deployment. The deployment consists of a hybrid collection named Collection1.All computers have the Hyper-V feature installed and have a virtual machine that runs Windows 7.You plan to install applications named App1 and App2 and make them available to all users. App1 is a 32-bit application. App2 is a 64-bit application.You need to identify the installation method for each application. The solution needs to minimize the number of installations.Which deployment method should you identify for each application? To answer, drag the appropriate deployment methods to the correct applications. Each deployment method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.NOTE: Each correct selection is worth one point.**Answer:** Explanation:
