In addition, C-HANAIMP-17 learning materials are edited and verified by professional experts who possess the professional knowledge for the exam, and the quality can be guaranteed.

#### **NEW QUESTION: 1**

Scenario

Product Summary

A list of customers will be collated. This will use existing information from the Accounts department about current customers, and existing information from the Marketing department about prospective customers.

Using the tariff of mailing costs available from the Post Office, a production cost forecast will be produced to allow

the CEO and the Marketing Director to decide whether to continue with the project. If they decide to continue, they will give the approval to launch the internal label design competition. Competition rules will be required to communicate details of the competition to the staff. The chosen label design will then be selected from the competition entries. The photos for the calendar must be based on existing photo design ideas available from the Marketing department. The selected photos will be chosen from these. Monthly calendar displays will be created to show the required layout of each page.

Product Breakdown Structure (contains errors)

Extract from Stage Plan for stage 3.

(All entries are true statements but may not be shown under the correct heading or in the correct document).

Using the Project Scenario and the Extract from Stage Plan for stage 3 provided as additional intonation for this question in the Scenario Booklet, answer the following 5 questions.

The Stage Plan for stage 3 has been produced.

The Engineering Manager insists that there are to be no interruptions to operations whilst photographs are being taken of the engineering staff performing their everyday duties and operating machinery. Two weeks ago the professional photographer produced the photo session schedule based on the operational staff schedule. The operational staff schedule is produced weekly and maintained by the Engineering Manager. None of the £500 change budget has been used to date and this is available for the stage.

Which 2 statements apply to the Planning assumptions section?

- A.** Delete entry 10 because the inclusion of different members from the Engineering team in each photo should be shown in the Product Description for the photos.
- B.** Move entry 9 to External dependencies because the photo session schedule is created by the professional photographer.
- C.** Move entry 8 to External dependencies because the label designs are created outside of the scope of the project.
- D.** No change to entry 8 because this cannot be confirmed until all of the label designs entries have been received and an assessment made.
- E.** Delete entry 9 because the photo session schedule should have been approved as part of stage 2.

**Answer: A,D**

## **NEW QUESTION: 2**

Recently a company updated their network infrastructure. A user reports that a laptop is experiencing slower network speeds since the update. Which of the following would the technician replace, rather than purchase a new device?

- A.** Hard drive

- B. RAM
- C. Wireless NIC
- D. CPU

**Answer: C**

**NEW QUESTION: 3**

Fourth Coffee has an ASP.NET Core web app that runs in Docker. The app is mapped to the `www.fourthcoffee.com` domain. Fourth Coffee is migrating this application to Azure. You need to provision an App Service Web App to host this docker image and map the custom domain to the App Service web app.

A resource group named `FourthCoffeePublicWebResourceGroup` has been created in the WestUS region that contains an App Service Plan named `AppServiceLinuxDockerPlan`.

Which order should the CLI commands be used to develop the solution? To answer, move all of the Azure CLI command from the list of commands to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

Step 1: `#bin/bash`

The `appName` is used when the `webapp-name` is created in step 2.

Step 2: `az webapp config hostname add`

The `webapp-name` is used when the `webapp` is created in step 3.

Step 3: `az webapp create`

Create a web app. In the Cloud Shell, create a web app in the `myAppServicePlan` App Service plan with the `az webapp create` command.

Step : `az webapp config container set`

In Create a web app, you specified an image on Docker Hub in the `az webapp create` command. This is good enough for a public image. To use a private image, you need to configure your Docker account ID and password in your Azure web app.

In the Cloud Shell, follow the `az webapp create` command with `az webapp config container set`.
