#### **NEW QUESTION: 1**

An organization is on a Digital Transformation journey. The business is adopting agile application development methodologies to respond to customer feedback more quickly and

to improve mobile applications. The IT department recommends that the company use a PaaS solution implemented on new infrastructure. They want to build a small software-defined storage solution that can easily scale as the journey continues. IT wants the ability to leverage various hypervisors.

What solution will meet the goals of both the business and the IT department?

- A. XC Series
- B. VxRail
- C. VxRack AS
- D. VxBlock

**Answer: B**

### **NEW QUESTION: 2**

In the exhibit,

where should the WCCP redirection take place for traffic originating from the clients to the servers, assuming redirect IN is used?

- A. E
- B. D
- C. B
- D. A
- E. C

**Answer: D**

### **NEW QUESTION: 3**

What remote service is required to enable Remote Logging in the Dell EMC Unity XT system?

- A. Syslog
- B. SNMPv2
- C. SNMPv3
- D. Unisphere agent

**Answer: A**

Explanation:

Before configuring remote logging for a storage system, you must configure each remote system to receive logging messages from the storage system. A root/administrator on the receiving computer can configure the remote syslog server or rsyslog server to receive log information by editing the syslog server or rsyslog server configuration file (syslogng.conf or rsyslog.conf) on the remote system.

**NEW QUESTION: 4**

Your network contains an Active Directory domain named contoso.com. The domain contains a read-only domain controller (RODC) named RODC1.

You create a global group named RODC\_Admins.

You need to provide the members of RODC\_Admins with the ability to manage the hardware and the software on RODC1. The solution must not provide RODC\_Admins with the ability to manage Active Directory objects.

What should you do?

- A. From Windows PowerShell, run the Set-ADAccountControlcmdlet.
- B. From a command prompt, run the dsmgmt local roles command.
- C. From Active Directory Site and Services, configure the Security settings of the RODC1 server object.
- D. From Active Directory Users and Computers, configure the Member Of settings of the RODC1 account.

**Answer: B**

Explanation:

RODC: using the dsmgmt.exe utility to manage local administrators One of the benefits of RODC is that you can add local administrators who do not have full access to the domain administration. This gives them the ability to manage the server but not add or change active directory objects unless those roles are delegated. Adding this type of user is done using the dsmdmt.exe utility at the command prompt.
