The 100% guarantee pass pass rate of C1000-105 training materials that guarantee you to pass your Exam and will not permit any type of failure, If you trust us and pay more attention on our actual test questions and answers we assure you 100% pass C1000-105 exam.

Please contact our customer [C1000-105](#) service before you want to claim exchange or refunds.

NEW QUESTION: 1

Which of the following is a valid Java code snippet?

A. `String s = "Hello World";`
B. `String s = "Hello World";`
C. `String s = "Hello World";`
D. `String s = "Hello World";`

A. `String s = "Hello World";`

B. `String s = "Hello World";`

C. `String s = "Hello World";`

D. `String s = "Hello World";`

Answer: A

NEW QUESTION: 2

Given the code fragment:

```
public static void main (String[] args) throws IOException {  
    BufferedReader brCopy = null;  
    try (BufferedReader br = new BufferedReader (new  
        FileReader("employee.txt"))) { // line n1  
        br.lines().forEach(c  
            -> System.out.println(c)); brCopy = br; //line n2  
    }  
    brCopy.ready(); //line n3  
}
```

Assume that the ready method of the BufferedReader, when called on a closed BufferedReader, throws an exception, and employee.txt is accessible and contains valid text.

What is the result?

- A. A compilation error occurs at line n2.
- B. The code prints the content of the employee.txt file and throws an exception at line n3.
- C. A compilation error occurs at line n3.
- D. A compilation error occurs at line n1.

Answer: B

NEW QUESTION: 3

Which two statements about forwarding equivalence class (FEC) are true? (Choose two)

- A. FEC is a group of IP packets that is forwarded over a different path, but with the same forwarding treatment.
- B. FEC is a group of IP packets that is forwarded over the same path, but with a different forwarding treatment.
- C. FEC might correspond to a destination IP subnet, but it might also correspond to any traffic class that the edge LSR considers significant.
- D. FEC is a group of IP packets that is forwarded over a different path, but with the different forwarding treatment.
- E. FEC is a group of IP packets that is forwarded over the same path, and with the same forwarding treatment.

Answer: C,E

NEW QUESTION: 4

A multi-region, multi-availability zone application is being built on AWS Fargate, Amazon ElastiCache, Amazon RDS, and Amazon S3. The application consists of several services that interact with each other. The application is designed to be highly available and resilient. The application is built on a microservices architecture. The application is built on a distributed system. The application is built on a cloud-native architecture. The application is built on a container-based architecture. The application is built on a serverless architecture. The application is built on a hybrid cloud architecture. The application is built on a multi-cloud architecture. The application is built on a multi-tenant architecture. The application is built on a multi-tenant architecture. The application is built on a multi-tenant architecture. The application is built on a multi-tenant architecture. The application is built on a multi-tenant architecture.

Which two statements are true? (Choose two)

- A. Amazon EC2 instances must be used to host the application.
- B. Amazon ElastiCache instances must be used to host the application.
- C. Amazon RDS instances must be used to host the application.
- D. Amazon S3 instances must be used to host the application.
