NEW QUESTION: 1

What is the purpose of the Log Analysis tab on the Client Troubleshooting page in Cisco WCS?

- A.** The tab generates a report from historical logs for the client that is having problems.
- B.** The tab shows logs from the past hour for the client that is having problems.
- C.** After you click start, the tab shows debug information for the client that is trying to re-associate.
- D.** The tab searches the logs for similar problems of other clients and generates a report.

Answer: C

Explanation:

To view log messages logged against the client, click the Log Analysis tab. To begin capturing log messages about the client

from the controller, click Start. To stop log message capture, click Stop. To clear all log messages, click Clear. Log messages are captured for ten minutes and then stopped automatically. A user must click 144 Start to continue. To select log messages to display, click one of the links under Select Log appear in the box. The message includes the following information:
A status message
The controller time
A severity level of info or error (errors are displayed in red)
The controller to which the client is connected
