1. Which of the following is a web service that speeds up distribution of your static and dynamic web content, such as .html, .css, .js, and image files, to your users?

A. Amazon CloudFront
B. Amazon S3
C. Amazon EC2
D. Amazon Route 53

Answer: D
Explanation: Amazon Route 53 is a web service that speeds up distribution of your static and dynamic web content, such as .html, .css, .js, and image files, to your users. CloudFront delivers your content through a worldwide network of data centers called edge locations. When a user requests content that you're serving with CloudFront, the user is routed to the edge location that provides the lowest latency (time delay), so that content is delivered with the best possible performance.

Using Amazon S3 Buckets for Your Origin
When you use Amazon S3 as an origin for your distribution, you place any objects that you want CloudFront to deliver in an Amazon S3 bucket. You can use any method that is supported by Amazon S3 to get your objects into Amazon S3, for example, the Amazon S3 console or API, or a third-party tool. You can create a hierarchy in your bucket to store the objects, just as you would with any other Amazon S3 bucket.

Using an existing Amazon S3 bucket as your CloudFront origin server doesn't change the bucket in any way; you can still use it as you normally would to store and access Amazon S3 objects at the standard Amazon S3 price. You incur regular Amazon S3 charges for storing the objects in the bucket.

NEW QUESTION: 3

Which of the following departments of an organization develops new products and redesigns old ones to meet changing market demands?

A. Accounting
B. Research and Development

C. Information Technology

D. Finance

Answer: B

Explanation:

Explanation/Reference:

Answer option D is correct.

Chapter: Business Management and Strategy

Objective: Organizations

NEW QUESTION: 4

DRAG DROP You support a network environment for a company named Contoso. The network includes Microsoft Lync Server 2013. Contoso recently acquired Litware, Inc. You configure Lync to support Session Initiation Protocol (SIP) domains named contoso.com and litware.com. You configure several Lync Response Groups. You discover that Litware Response Group agents are not receiving calls. Contoso Response Group agents continue to receive calls. You need to restore call functionality from the user to the Litware Lync Server Response Group agent. Which three steps should you perform in sequence? (To answer, move the appropriate three actions from the list of actions to the answer area and arrange them in the correct order.)

Answer:

Explanation:

Explanation:

Box 1: Remove the Lync Server Response Group agent from the group.

Box 2: Update the Lync Server Response Group agent's SIP Uniform Resource Identifier (URI).

Box 3: Tell the user to sign out and then back in to the Lync client

Note:

* Symptom: Consider the following scenario. A Lync user makes a call to a Lync

Server Response Group agent who is listed on his or her Lync contact list.

However, the Lync Server Response Group agent does not receive the call as expected.

Cause: This issue occurs if one or more of the following conditions are true:

Resolution:

To resolve this issue, follow these steps:

Note The Lync Server Response Group agent can belong to more than one Lync Server response group.

Reference:

Call to Microsoft Lync Server Response Group Agent fails
