Take a look at CIPP-C preparation exam, and maybe you'll find that's exactly what you've always wanted, Refund in case of failure.

NEW QUESTION: 1
A customer implemented a release management tool which holds inventory of systems that it manages. The customer wants to reconcile this data with configuration items discovered by IBM

Tivoli Application Dependency Discovery Manager (TADDM). Which tool can import this data on a regular basis?
A. Custom Server Templates for TADDM
B. Migration Manager
C. Custom Server Extensions for TADDM
D. IBM Tivoli Integration Composer
Answer: D

NEW QUESTION: 2
DRAG DROP

Answer:
Explanation:

Explanation:

Retention Policy Tags are used to apply retention settings to folders and individual items such as e-mail messages. These settings specify how long a message remains in a mailbox and the action to be taken when the message reaches the specified retention age.
A Retention Policy is a group of retention tags that can be applied to a mailbox.
In this question, we have a new retention policy named Policy-90. We need to create a new retention tag to specify the deletion of email messages in the Deleted Items folder after 90 days. We then need to assign the retention tag to the Policy-90 retention policy. Then we apply the Policy-90 retention policy to mailboxes.
The New-RetentionPolicyTag cmdlet creates a new retention tag.
The Set-RetentionPolicy cmdlet adds the retention tag to the retention policy.
TheGet-Mailbox cmdlet retrieves a list of mailboxes and the Set-Mailbox cmdlet is used to assign the retention policy to the mailboxes.

NEW QUESTION: 3
Click to expand each objective. To connect to the Azure portal, type https://portal.azure.com in the browser address bar.

When you are finished performing all the tasks, click the 'Next' button.
Note that you cannot return to the lab once you click the 'Next' button. Scoring occur in the background while you complete the rest of the exam.
Overview
The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
To start the lab
You may start the lab by clicking the Next button.
You plan to migrate a large amount of corporate data to Azure Storage and to back up files stored on old hardware to Azure Storage.
You need to create a storage account named corpdata7523690n1 in the corpdatalog7523690 resource group.
The solution must meet the following requirements:
Corpdata7523690n1 must be able to host the virtual disk files for Azure virtual machines.
The cost of accessing the files must be minimized.
Replication costs must be minimized.
What should you do from the Azure portal?
Answer:
Explanation:
See solution below.
Explanation
Step 1: In the Azure portal, click All services. In the list of resources, type Storage Accounts. As you begin typing, the list filters based on your input. Select Storage Accounts.
Step 2: On the Storage Accounts window that appears, choose Add.
Step 3: Select the subscription in which to create the storage account.
Step 4: Under the Resource group field, select corpdatalog7523690.

Step 5: Enter a name for your storage account: corpdata7523690n1
Step 6: For Account kind select: General-purpose v2 accounts

(recommended for most scenarios) General-purpose v2 accounts is recommended for most scenarios. . General-purpose v2 accounts deliver the lowest per-gigabyte capacity prices for Azure Storage, as well as industry-competitive transaction prices. Step 7: For replication select: Read-access geo-redundant storage (RA-GRS) Read-access geo-redundant storage (RA-GRS) maximizes availability for your storage account. RA-GRS provides read-only access to the data in the secondary location, in addition to geo-replication across two regions.
