#### **NEW QUESTION: 1**

Your network contains an Active Directory domain named adatum.com. The domain contains 10 domain controllers that run Windows Server 2012 R2.

You plan to create a new Active Directory-integrated zone named contoso.com.

You need to ensure that the new zone will be replicated to only

four of the domain controllers.

What should you do first?

- A. Create an application directory partition.
- B. Create an Active Directory site link.
- C. Change the zone replication scope.
- D. Create an Active Directory connection object.

**Answer: A**

Explanation:

Application directory partitions

An application directory partition is a directory partition that is replicated only to specific domain controllers. A domain controller that participates in the replication of a particular application directory partition hosts a replica of that partition. Only domain controllers running Windows Server 2003 can host a replica of an application directory partition.

### **NEW QUESTION: 2**

Refer to the exhibit.
