NEW QUESTION: 1HOTSPOTYou need to configure transport rules to meet the technical requirements for the PII data and the financial data.How should you configure the rules?To answer, disable the appropriate rule or rules in the answer area.

Answer: Explanation:Topic 2, A.DatumOverview General Overview A). Datum Corporation is a pet supply company that has stores across North America.A). Datum has an Exchange Server 2007 organization. A. Datum plans to migrate to Exchange Server 2013.Physical LocationsA). Datum has five locations. The locations are configured as shown in the following table. Existing Environment Network InfrastructureAll of the locations

connect to the each other by using a WAN link. The New York, Toronto, and Chicago locations connect directly to the Internet. All client computers run Windows 7 and Office 2010. All servers run Windows Server 2008.

Active Directory Environment

The network contains an Active Directory domain named adatum.local. Adatum.local is the corporate domain based in the United States. The network contains a domain named Canada.adatum.local. Canada.adatum.local is the domain for the stores in Canada. Each location is configured as an Active Directory site. The forest functional level is Windows Server 2008. The main office and both of the distribution centers each has two domain controllers for their respective domain. All of the other locations have one domain controller for their respective domain. All of the domain controllers are global catalog servers.

Exchange Infrastructure

The main office and the distribution centers each have three servers that have Exchange Server 2007 installed. The servers have the following configurations:- Two of the servers have cluster continuous replication (CCR) deployed- One of the servers has the Client Access server role and the Hub Transport server role installed. Each store contains a server that has Exchange Server 2007 installed. Each server has mailboxes for active users and mailboxes for inactive users. Each server has approximately 50 mailboxes. Remote users access Outlook Web Access by using a namespace of mail.adatum.com, which resolves to the Client Access server in the New York office.

Requirements

Planned Changes

The company plans to implement the following changes: Migrate all of the mailboxes in the main office and the distribution centers to Exchange Server 2013. --- Integrate a new telephone system to the Exchange Server 2013 organization. Deploy a standalone certification authority (CA) that will be used to issue all of the certificates for the messaging infrastructure.

Technical Requirements

The company identifies the following technical requirements: --- Hardware costs must be minimized whenever possible. The impact on end users if a site fails must be minimized. Voice mail traffic between the telephone system and the Exchange Server environment must be encrypted. Each user must be able to access the internal resources and their mailbox by using a single user account. -

Compliance Requirements

After a security review, the company identifies the following compliance requirements for the new Exchange Server environment: --- All administrative changes made to the mailboxes must be tracked. The legal department must be able to search for messages in all of the mailboxes. Users must be prevented from sending email during an upcoming statutory --- -holiday. All store managers must be prevented from permanently deleting email messages from their Inbox. All email messages must be archived for a minimum of five years to meet regulatory requirements. Management occasionally sends the staff internal memos that contain confidential information, such as sales figures. The memos must be protected so that unauthorized users cannot read the memos and internal users cannot forward the memos to external recipients. The users in

the research department must be able to send email to anyone in the organization, but only the members of a group named Execs must be able to send email to the research users. All other users must be notified that email sent to the research users will remain undelivered.

NEW QUESTION: 2 Providing a user access to an application in the Cloud requires several steps. In which step are the user's permissions determined?**A.** during the authentication phase**B.** during the auditing phase**C.** during the authorization phase**D.** during the verification phase**Answer: C**

NEW QUESTION: 3 What are two benefits of private IPv4 IP addresses? (Choose two.)**A.** They are less costly than public IP addresses.**B.** They eliminate the necessity for NAT policies.**C.** They are routed the same as public IP addresses.**D.** They can be assigned to devices without Internet connections.**E.** They eliminate duplicate IP conflicts.**Answer: A,D**
