NEW QUESTION: 1
Huawei's self-developed network control chip can achieve high-energy network acceleration. The following is the correct understanding of this network control chip.
A. Huabu IN series intelligent network card can support 2*100G, 4*25G network connection, and can support PCIE GEN3*16 system connection
B. Through self-developed programmable network engine, Huawei UNI QUE NETWORK intelligent network card can accelerate business in cloud network, cloud storage and other scenarios,

while optimizing infrastructure utilization
C. Huawei IN series adopts standard card form, which is convenient for various server deployment and operation and maintenance
Answer: A,B,C

NEW QUESTION: 2
You need to create a virtual hard disk (VHD) file that will be used to deploy Windows 7. The solution must minimize the performance impact caused by using a VHD.
Which type of VHD should you create?
A. fixed-size disk
B. dynamically expanding disk
C. snapshot
D. differencing disk
Answer: A
Explanation:
Typically, you place the VHD on a second internal or external hard disk (although this is not essential). You then specify the VHD size and format settings. Microsoft recommends the default Fixed Size setting, but you can select Dynamic Expanding if you do not want to allocate the disk space. Fixed Size gives better performance and is more suitable in a production environment.

NEW QUESTION: 3
Which option is true about routing control while using routing protocols in a DMVPN network (or any GRE- over-IPsec network)?
A. Routing of the data plane traffic should be carried out by means of the GRE tunnel and a separate routing instance should be used to handle routing of the crypto endpoints.
B. The routing used to establish the crypto endpoints should include information for the data networks behind the endpoints.
C. If the network is a private MPLS network, the routing for the data plane traffic and the crypto endpoints should be run outside of the GRE tunnel.
D. The control plane traffic for the crypto endpoints should be routed through the GRE tunnel; the control plane traffic for the data plane traffic should travel via the transport network.
Answer: A
Explanation:
Section: (none)
