**NEW QUESTION: 1**
HOTSPOT
You create a virtual network named fabVNet01.
You design the virtual network to include two subnets, one
named DNS-subnet and one named Apps- subnet, as shown in the
exhibit. (Click the Exhibits button.)

In the table below, identify the number of IP addresses that
will be available for virtual machines (VMs) or cloud services
in each subnet. Make only one selection in each column.
Hot Area:

**Answer:**
Explanation:

**NEW QUESTION: 2**
Which statement correctly describes customers who purchase HP
Network Support Services as compared to customers who rely only
on the included warranty?
**A.** They are more satisfied but no more likely to purchase
another HP solution in the future.
**B.** They are no more satisfied and less likely to purchase
another HP solution in the future.
**C.** They are no more satisfied but more likely purchase another
HP solution in the future.
**D.** They are more satisfied and more likely to purchase another
HP solution in the future.
**Answer: D**

**NEW QUESTION: 3**
The Job Title attribute for a domain user named User1 has a
value of Sales Manager.
User1 runs whoami /claims and receives the following output:

Kerberos support for Dynamic Access Control on this device has
been disabled.
You need to ensure that the security token of User1 has a claim
for Job Title. What should you do?
**A.** From Active Directory Administrative Center, add a claim
type.
**B.** From a Group Policy object (GPO), configure KDC support for
claims, compound authentication, and Kerberos armoring.
**C.** From Active Directory Users and Computers, modify the
properties of the User1 account.

**D.** From Windows PowerShell, run the New-ADClaimTransformPolicy cmdlet and specify the -Name parameter

**Answer: A**

Explanation:

Explanation

From the output, obviously, a claim type is missing (or disabled) so that the domain controller is not issuing tickets with the "Job Title" claim type.

**NEW QUESTION: 4**

Instructions

For both the Router and the Switch the simulated console mode needs to start and remain in enabled mode.

RouterA and SwitchA have been configured to operate in a private network which will connect to the Internet. You have been asked to review the configuration prior to cabling and implementation.

This task requires the use of various IOS commands to access and inspect the running configuration of RouterA and SwitchA. No configuration changes are necessary.

You will connect to RouterA and SwilchA via the console devices that are attached to each.

There are 4 multiple-choice questions with this task. Be sure to answer all of them before leaving this item.

In order to score the maximum points you will need to have accessed both SwitchA and RouterA.

NOTE: The configuration command has been disabled for both the router and switch in this simulation.

Which two of the following are true regarding the configuration of RouterA? (Choose two.)

**A.** since DHCP is not used on Fa0/1 there is no need to use the NAT protocol

**B.** only telnet protocol connections to RouterA are supported

**C.** console line connections will never time out due to inactivity

**D.** remote connections to RouterA using telnet will succeed

**E.** at least 5 simultaneous remote connections are possible

**Answer: D,E**

Explanation:

Explanation/Reference:

Explanation:

Here is the RouterA configuration:

for Router

!

!

no service password-encryption

!

hostname Router1

enable secret 5 $1$14mlkm52....

ip domain-name cisco.com

```
ip ssh version 2
!
!
username ciscouser password 0 cisco
banner login
```
