1. Refer to the exhibit. Which password must an engineer use to enter the enable mode? **A.** cisco123 **B.** default **C.** testing 1234 **D.** adminadmin123 **Answer: C**
 Explanation: Explanation If neither the enable password command nor the enable secret command is configured, and if there is a line password configured for the console, the console line password serves as the enable password for all VTY sessions -> The "enable secret" will be used first if available, then "enable password" and line password.

2. After completing the project charter, the project manager sends it to the project stakeholders. What should the project manager do before starting the project planning process? **A.** Obtain project charter approval. **B.** Develop the risk register. **C.** Create the work breakdown structure (WBS). **D.** Conduct the project's kick-off meeting. **Answer: A**

3. Refer to the exhibit. Which two statements describe the network shown in the graphic? (Choose two) **A.** There are six broadcast domains in the network. **B.** There are five collision domains in the network. **C.** There are seven collision domains in the network. **D.** There are four collision domains in the network. **E.** There are four broadcast domains in the network. **F.** There are two broadcast domains in the network. **Answer: C, F**
