NEW QUESTION: 1 You are creating a database that will store usernames and passwords for an application. You need to recommend a solution to store the passwords in the database. What should you recommend? More than one answer choice may achieve the goal. Select the BEST answer. **A.** Transparent Data Encryption (TDE) **B.** Encrypting File System (EFS) **C.** Reversible encryption **D.** One-way encryption **Answer: B** Explanation:

Explanation/Reference: Explanation: 1. Transparent Data Encryption (TDE) is a special case of encryption using a symmetric key. TDE encrypts an entire database using that symmetric key called the database encryption key. The database encryption key is protected by other keys or certificates which are protected either by the database master key or by an asymmetric key stored in an EKM module. 2. SQL Server provides the following mechanisms for encryption: Transact-SQL functions Asymmetric keys Symmetric keys Certificates Transparent Data Encryption
