Just to prove our confidence associated with our products, we encourage the use of our free trial, C_HANADEV_17 Online test engine is convenient and easy to learn, and you **Test C_HANADEV_17 Practice** can have a general review of what you have learned through the performance review.

The development of science and technology makes our life **Test C_HANADEV_17 Practice** more comfortable and convenient, which also brings us more challenges, Ethical principles of company, While preparing the SAP Certified Development Associate C_HANADEV_17 exam dumps, you get to know the pattern of the exam paper and the form of SAP Certified Development Associate - SAP HANA 2.0 SPS05 practice questions as well.

We are very confident of the Products Offered, C_HANADEV_17 Latest Exam Cram so we offer 100% Money Back Guarantee On any Exam Package- you will definitely get GoodScores, Moreover, we have guaranteed you that New APP C_HANADEV_17 Simulations you would have no trouble during the actual test with our SAP Certified Development Associate - SAP HANA 2.0 SPS05 update exam training.

C_HANADEV_17 practice materials are not only financially accessible, but time-saving and comprehensive to deal with the important questions trying to master them efficiently.

NEW QUESTION: 1
A company builds an application to allow developers to share and compare code. The conversations, code snippets, and links

shared by people in the application are stored in a Microsoft Azure SQL Database instance.

The application allows for searches of historical conversations and code snippets.

When users share code snippets, the code snippet is compared against previously share code snippets by using a combination of Transact-SQL functions including SUBSTRING, FIRST_VALUE, and SQRT. If a match is found, a link to the match is added to the conversation.

Customers report the following issues:
* Delays occur during live conversations
* A delay occurs before matching links appear after code snippets are added to conversations You need to resolve the performance issues.

Which technologies should you use? To answer, drag the appropriate technologies to the correct issues. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:
Explanation:

Explanation

Box 1: memory-optimized table
In-Memory OLTP can provide great performance benefits for transaction processing, data ingestion, and transient data scenarios.

Box 2: materialized view
To support efficient querying, a common solution is to generate, in advance, a view that materializes the data in a format suited to the required results set. The Materialized View pattern describes generating prepopulated views of data in environments where the source data isn't in a suitable format for querying, where generating a suitable query is difficult, or where query performance is poor due to the nature of the data or the data store.

These materialized views, which only contain data required by a query, allow applications to quickly obtain the information they need. In addition to joining tables or combining data entities, materialized views can include the current values of calculated columns or data items, the results of combining values or executing transformations on the data items, and values specified as part of the query. A materialized view can even be optimized for just a single query.
