**NEW QUESTION: 3****A.** Option C**B.** Option A**C.** Option B**D.** Option D**Answer: D****Explanation:**Explanation Scenario: Enable Azure Multi-Factor Authentication (MFA) for the users in the finance department only. Conditional Access is a feature of Azure Active Directory (Azure AD) that lets you control how and when users can access applications and services. Note: In Azure Active Directory (Azure AD), you can create complex attribute-based rules to enable dynamic memberships for groups. Dynamic group

membership reduces the administrative overhead of adding and removing users. When any attributes of a user or device change, the system evaluates all dynamic group rules in a directory to see if the change would trigger any group adds or removes. If a user or device satisfies a rule on a group, they are added as a member of that group. If they no longer satisfy the rule, they are removed. References:
