NEW QUESTION: 3

Your network contains an Active Directory forest that contains two domains. The forest contains five domain controllers. The domain controllers are configured as shown in the following table.

You need to configure DC5 as a global catalog server. Which tool should you use?

- A. Active Directory Sites and Services
- B. Active Directory Domains and Trusts
- C. Active Directory Users and Computers
- D. Active Directory Administrative Center

Answer: A

Explanation:

Active Directory Sites and Services can be used to Add or remove the global catalog read-only directory partitions from a domain controller in the site. Confirm that all read-only directory partitions have been replicated to the new global catalog server. As well as verify that the global catalog server is being advertised in Domain Name System (DNS).
