According to these ignorant beginners, the [C_THR83_2305](#) exam questions set up a series of basic course, by easy to read, with corresponding examples to explain at the same time, the [C_THR83_2305](#) study question let the user to be able to find in real life and corresponds to the actual use of [C_THR83_2305](#) learned knowledge.

NEW QUESTION: 1 Click the exhibit button. A customer reports that their system recently began logging an error. Referring to the exhibit, which two statements are correct? (Choose two.)
A. A user is attempting to restart the ntpd daemon.
B. The spmd application failed to restart the ntpd daemon.
C. The bcomd application is responsible for monitoring the observed behavior.
D. The ntpd daemon is responsible for time services.
Answer: A,D

NEW QUESTION: 2 A multi-national company has a highly mobile workforce and minimal IT infrastructure. The company utilizes a BYOD and social media policy to integrate presence technology into global collaboration tools by individuals and teams. As a result of the dispersed employees and frequent international travel, the company is concerned about the safety of employees and their families when moving in and out of certain countries. Which of the following could the company view as a downside of using presence technology?
A. Physical security
B. Network reconnaissance
C. Industrial espionage
D. Insider threat
Answer: A
Explanation: If all company users worked in the same office with one corporate network and using company supplied laptops, then it is easy to implement all sorts of physical security controls. Examples of physical security include intrusion detection systems, fire protection systems, surveillance cameras or simply a lock on the office door. However, in this question we have dispersed employees using their own devices and frequently traveling internationally. This makes it extremely difficult to implement any kind of physical security. Physical security is the protection of personnel, hardware, programs, networks, and data from physical circumstances and events that could cause serious losses or damage to an enterprise, agency, or institution. This includes protection from fire, natural disasters, burglary, theft, vandalism, and terrorism.
Incorrect Answers:
A: An insider threat is a malicious hacker (also called a cracker or a black hat) who is an employee or officer of a business, institution, or agency. Dispersed employees using presence technology does not increase the risk of insider threat when compared to employees working together in an office.
B: The risk of network reconnaissance is reduced by having dispersed employees using presence technology. The risk of network reconnaissance would be higher with employees working together in a single location such as an office.
D: Industrial espionage is a threat to any business whose livelihood depends on information. However, this threat is not increased by having dispersed employees using presence technology. The risk would be the same with dispersed employees using presence technology or employees working together in a single location such as an office.

NEW QUESTION: 3 Where is the encryption key stored when using ENABLECLIENTENCRYPTKEY for encryption?
A. as part of the client

backup
B. on the server in an encrypted file
C. on the client node in an encrypted file
D. in the server database
Answer: D

NEW QUESTION: 4 Which two statements are true for the group backup?
A. All objects in the group are expired together.
B. It performs a full or differential backup.
C. It uses different management classes for the objects.
D. It cannot be added to a backup set.
E. Existing exclude statements for any files in the group are honored.
Answer: A, B
