Many questions of our C_THR88_2211 study materials deserve your careful learning.

NEW QUESTION: 1

You are creating a Windows Embedded Standard 7 image for a target device. The target device currently runs desktop Windows. The device was previously used in a production environment and had several USB devices attached to it. These USB devices are currently unavailable. You need to create a file to import the devices hardware information into Image Configuration Editor (ICE). You also need to ensure that the file includes information about the USB devices. What should you do?

- A.** Start the target device with retail Windows and run the ImageX.exe tool.
- B.** Start the target device by using WindowsPE and run the TAP.exe tool.
- C.** Start the target device with retail Windows and run the TAP.exe tool.

D. Start the target device by using WindowsPE and run the ImageX.exe tool.

Answer: C

NEW QUESTION: 2

Which two statements define the use of route targets and route distinguishers in an EVPN? (Choose two.)

A. Route targets identify the VRF into which the route should be placed.

B. Route distinguishers ensure that routes from different clients remain unique within the data center domain.

C. Route distinguishers identify the VRF into which the route should be placed.

Answer: A,B

NEW QUESTION: 3

You are profiling a frequently used database table named UserEvents. The READ_COMMITTED_SNAPSHOT database option is set to OFF.

In the trace results, you observe that lock escalation occurred for one stored procedure even though the number of locks in the database did not exceed memory or configuration thresholds.

Events details are provided in the following table:

You need to modify the uspDeleteEvents stored procedure to avoid lock escalation.

How should you modify the stored procedure? To answer, select the appropriate Transact-SQL segments in the answer area.

Answer:

Explanation:

Explanation

Delete up to 4000 rows at a time. Keep doing it until all rows have been deleted.

Note that @@ROWCOUNT returns the number of rows affected by the last statement.
