Answer: C

NEW QUESTION: 3 A project has a very tight delivery schedule. The project is approaching the delivery date, and the project sponsor often sends the project manager alerts to avoid any schedule slippage. The project team has performed at an acceptable level until now, but the project manager wants to ensure that team's performance level is performance is maintained until the end. What action should the project manager

take to motivate the project team's performance?**A.** Inform the team about the delivery pressure from the project sponsor**B.** Hire a few temporary team members to help with the additional work.**C.** Award certificates of appreciation to encourage the team**D.** Send a formal notice to team members instructing them to maintain performance**Answer: C**

NEW QUESTION: 4Users access documents by searching for them using a fulltext query. The query could potentially return hundreds of thousands of documents; however users are only allowed to access those that were generated within the user's own department, which is a small number of documents. Access is controlled using an ACL that grants appropriate access by department. Which data modeling approach will significantly improve the response time for the query without changing the query semantics?**A.** Modify the query to run at the database rather than the fulltext server.**B.** Modify the ACL to restrict, rather than grant, access using the access restrictions feature of Trusted Content Services.**C.** Ensure that the ACL assigned to documents does not contain a large number of accessors.**D.** Add an attribute value to documents that indicates the originating department and modify the query to filter on this attribute.

Answer: D
