Answer:
Explanation:

Explanation:
Step 1: Create an access review program
Step 2: Create an access review control
Step 3: Set Reviewers to Group owners
In the Reviewers section, select either one or more people to review all the users in scope. Or you can select to have the members review their own access. If the resource is a group, you can ask the group owners to review.

NEW QUESTION: 4
Which statement best describes the relationship between the
Logical View and the Development view of the Service-Oriented
Integration architecture?
A. The Logical View defines the layers of the architecture and
the capabilities within each layer. The Development View
describes how aspects of the architecture impact developers
following the architecture.
B. The two architectural views are Independent and there is no
relationship between them.
C. The Logical View defines the rationale for layers within the
architecture. The Development View specifies the developer
tools used for each layer.
D. The Logical View defines the layers of the architecture and
the capabilities within each layer. The Development View
specifies the developer tools that provide the capabilities for
each layer.
E. The Logical View specifies the developer tools required by
each layer in the architecture. The Development View describes
the developer impact of the tools specified.
Answer: A
Explanation:
* The Logical View of the architecture describes the various
layers in the
architecture.
Each layer encapsulates specific capabilities for the overall
architecture. Upper layers
in the architecture leverage the capabilities provided by the
lower layers.
*The Development View of the architecture describes aspects of
the architecture that are
of interest to developers building assets that conform to and
leverage the architecture.
In a service-oriented integration architecture the primary
developer artifacts are the
SOA Services that are created to expose data and functionality
contained in source
systems.
