You can download H12-731-ENU updated dumps on probation, And we insist of No Help Full Refund.

NEW QUESTION: 1

Cloud computing relies heavily on which of the following virtualization characteristics?

(Select two.)

- A. Hardware independence
- B. Simplistic setup
- C. Scalable resources
- D. Information sharing
- E. User federation

Answer: A,C

Explanation:

B: Virtualization is a conversion process that translates unique IT hardware into emulated and standardized

software-based copies. Through hardware independence, virtual servers can easily be moved to another virtualization host, automatically resolving multiple hardware-software incompatibility issues. As a result, cloning and manipulating virtual IT resources is much easier than duplicating physical hardware.

D: Infrastructure as a Service (IaaS) is a form of cloud computing that provides virtualized computing resources over the Internet. IaaS platforms offer highly scalable resources that can be adjusted on-demand.
