Pass Guaranteed 2023 Huawei - H12-821_V1.0-ENU - HCIP-Datacom-Core Technology V1.0 Cert

The H12-821_V1.0-ENU sample questions include all the files you need to prepare for the H12-821_V1.0-ENU exam, In order follow the trend of the times, Our H12-821_V1.0-ENU study guide offers the PDF version to you.

Bogged down in review process right now, our H12-821_V1.0-ENU training materials with three versions can help you gain massive knowledge, In addition, H12-821_V1.0-ENU exam materials are compiled by professional experts, and therefore the quality can be guaranteed.

Also, you must invest time to review, Free demo facility is also available that will give you a real touch about the quality of our Huawei H12-821_V1.0-ENU dumps exam.

Some candidates even get a beautiful score with our H12-821_V1.0-ENU exam review, Easily accessible for mobile user, H12-821_V1.0-ENU training materials are high quality and you can pass the exam just one time if you choose us.

NEW QUESTION: 1

An architect proposes Aruba 2930F switches, which do not have OOBM ports. The customer wants to follow best practices for network management security. Which guideline can the architect follow?

- A.** Ensure that DHCP is enabled on only the switch Default VLAN.
- B.** Assign access layer switches IP addresses on a VLAN that is dedicated for switch management.
- C.** Ensure that Telnet is enabled and set to listen on production VLANs.
- D.** Assign switches static IP addresses on the same VLAN on which APs are deployed.

Answer: C

NEW QUESTION: 2

Click to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar.

When you are finished performing all the tasks, click the 'Next' button.

Note that you cannot return to the lab once you click the 'Next' button. Scoring occurs in the background while you complete the rest of the exam.

Overview

The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. To start the lab

You may start the lab by clicking the Next button.

You plan to deploy several Azure virtual machines and to connect them to a virtual network named VNET1007.

You need to ensure that future virtual machines in VNET1007 can register their name in an internal DNS zone named corp7523690.com. The zone must What should you do from Azure Cloud Shell?

To complete this task, start Azure Cloud Shell and select PowerShell(Linux). Click Show Advanced Settings, and then enter corp7523690n1 in the Storage account text box and File1 in the File share text box. Click Create storage, and then complete the task.

Answer:

Explanation:

See solution below.

Explanation

Step 1: `New-AzureRMResourceGroup -name MyResourceGroup`

Before you create the DNS zone, create a resource group to contain the DNS zone.

Step 2: `New-AzureRmDnsZone -Name corp7523690.com`

`-ResourceGroupName MyResourceGroup` A DNS zone is created by using the `New-AzureRmDnsZone` cmdlet. This creates a DNS zone called corp7523690.com in the resource group called

MyResourceGroup.
