NEW QUESTION: 1

You need to define multiple allocation rules as efficiently as possible. Which three components can be reused across allocation rules?

A. Formulas

- B. Point of View (POV)
- C. Run Time Prompts (RTP)
- D. RuleSets

Answer: B,C,D

Explanation:

Explanation

Allocation Manager: Overview

The Allocation Manager creates, validates, deploys, and administers sophisticated allocation rules. In the Allocation Manager:

Base formulas on multiple criteria, such as account balances or statistical amounts, to allocate shared revenue or costs across multiple organizational units.

Use complex computations based on different variables to automatically calculate allocated amounts.

Group journal formulas together and executed sequentially to update account balances step-by-step.

There are three types of objects that can be created in Allocation Manager:

Components: Contain formulas, points of view, or allocation objects.

Rules: Contain components such as points of view, formulas, and templates, which are used to create allocation calculations.

Rule Sets: Contain sets of rules that can be calculated sequentially

NoteThe following are limitation in Oracle Fusion General Ledger.

Allocation rules cannot be shared across rule sets in Allocation Manager.

Within a rule or rule set, the same target or offset cannot be written to by multiple rule components.

When generating allocation rules with run time prompts other than the User Point of View in an allocation rule component, an error occurs.
