- B.** The user can use 60 parameters and 60 outputs in a single template
- C.** One account by default is limited to 100 templates
- D.** One account by default is limited to 20 stacks

Answer: C

Explanation:

Explanation

AWS CloudFormation is an application management tool which provides application modelling, deployment, configuration, management and related activities. The limitations given below apply to the CloudFormation template and stack. There are no limits to the number of templates but each AWS CloudFormation account is limited to a maximum of 20 stacks by default. The Template, Parameter, Output, and Resource description fields are limited to 4096 characters. The user can include up to 60 parameters and 60 outputs in a template.
