#### **NEW QUESTION: 1**

A company purchases IoT devices to monitor manufacturing machinery. The company uses an Azure IoT Hub to communicate with the IoT devices.

The company must be able to monitor the devices in real-time. You need to design the solution.

What should you recommend?

- A. Azure Data Factory instance using Azure Portal
- B. Azure Data Factory instance using Microsoft Visual Studio
- C. Azure Analysis Services using Microsoft Visual Studio
- D. Azure Stream Analytics Edge application using Microsoft Visual Studio

**Answer: D**

Explanation:

Explanation

Azure Stream Analytics (ASA) on IoT Edge empowers developers to deploy near-real-time analytical intelligence closer to IoT devices so that they can unlock the full value of device-generated data.

You can use Visual Studio plugin to create an ASA Edge job.

**NEW QUESTION: 4**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains several Windows 10 devices. When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin.

You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you configure the Windows Hello for Business enrollment options.

Does this meet the goal?

A. Yes

B. No

**Answer: A**

Explanation:

Hello for Business is an alternative sign-in method that uses Active Directory or an Azure Active Directory account to replace a password, smart card, or a virtual smart card. It lets you use a user gesture to sign in, instead of a password. A user gesture might be a PIN, biometric authentication such as Windows Hello, or an external device such as a fingerprint reader.

Intune integrates with Hello for Business in two ways:

An Intune policy can be created under Device enrollment. This policy targets the entire organization (tenant-wide). It supports the Windows AutoPilot out-of-box-experience (OOBE) and is applied when a device enrolls.

An identity protection profile can be created under Device configuration. This profile targets assigned users and devices, and is applied during check-in.
