To let the clients be familiar with the atmosphere and pace [Free BL0-100 Download](#) of the real exam we provide the function of stimulating the exam, This is why we introduce UNLIMITED ACCESS MEGA PACK.

You will surely benefit from your correct choice, The finest thing about our HCS - Transmission (H35-260ä,-æ-†ç%^ ) dumps is that our H35-260-CN dumps questions and answers are verified by related subject **H35-260-CN Latest Exam Pattern** professionals and these professionals have more than 10-years experience in this field.

Quiz Huawei - H35-260-CN - High Pass-Rate HCS - Transmission (H35-260ä,-æ-†ç%^ ) Latest Exam Pattern

With so many methods to boost individual competitiveness, people may be **H35-260-CN Latest Exam Pattern** confused, which can bring you a successful career and brighter future efficiently, You will become the lucky guys if there has a chance.

If you are very busy, you can only use some of the very fragmented time to use our H35-260-CN study materials, These series of HCS-Transmission certification H35-260-CN dumps fully enrich your related professional knowledge, then help you easily obtain H35-260-CN certification.

H35-260-CN practice material is the best choice with the best benefits, Exam Dumps provide you with examination Hall scenario like what kind of Questions and answers are going to be included in the exam.

Experts groups offering help, If you want to carry the HCS-Transmission H35-260-CN dumps, then print it for better preparation, For passing HCS - Transmission (H35-260ä,-æ-†ç%^ ) exam, we are offering multiple H35-260-CN training products to enhance your chances of passing the H35-260-CN exam on the first attempt.

So as long as you buy our H35-260-CN learning guide, you can always have the latest exam questions and answers, We think highly of your thought and suggest, In addition, H35-260-CN online test engine takes advantage of an offline use, it supports any electronic devices.

Superwszywkaâ€™s top Huawei H35-260-CN dumps are meant to deliver you the best knowledge on HCS-Transmission certification syllabus contents.

#### **NEW QUESTION: 1**

: 287HOTSPOT

You have an Azure web app named App1 that has the following configurations:

\* The app runs on three instances.

\* The minimum number of instances is one.  
\* The maximum number of instances is five.  
You create the following autoscale rules for App1:  
\* Decrease the instance count by one when the CPU percentage is less than 30.  
\* Decrease the instance count by one when the memory percentage is less than 50.  
\* Increase the instance count by one when the CPU percentage is greater than 80.  
\* Increase the instance count by one when the memory percentage is greater than 75.  
You expect App1 to be utilized as shown in the following table.

You need to identify the maximum number of instances that will be used by App1 during the expected periods of utilization. What should you identify? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

On scale out, autoscale runs if any rule is met. On scale-in, autoscale requires all rules to be met. Therefore, the web app will scale out but will never scale back in because there is no time where the CPU is less than 30% AND the memory is less than 50%.

**NEW QUESTION: 2**

You are configuring a development environment for your team. You deploy the latest Visual Studio image from the Azure Marketplace to your Azure subscription. The development environment requires several software development kits (SDKs) and third-party components to support application development across the organization. You install and customize the deployed virtual machine (VM) for your development team. The customized VM must be saved to allow provisioning of a new team member development environment. You need to save the customized VM for future provisioning. Which tools or services should you use? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

Box 1: Azure Powershell

Creating an image directly from the VM ensures that the image includes all of the disks associated with the VM, including the OS disk and any data disks.

Before you begin, make sure that you have the latest version of the Azure PowerShell module.

You use Sysprep to generalize the virtual machine, then use Azure PowerShell to create the image.

Box 2: Azure Blob Storage

### **NEW QUESTION: 3**

A. Option C

B. Option D

C. Option A

D. Option B

**Answer: A**

Explanation:

Topic 5, Contoso Ltd

Overview

Contoso, Ltd. is a manufacturing company that has 3,000 users. Contoso has a data center in Toronto and 20 offices across Canada. The offices connect to each other by using a WAN link. Each office connects directly to the Internet.

Existing Environment

Active Directory Environment

The network contains an Active Directory forest named contoso.com. The forest contains a single domain. All domain controllers run Windows Server 2012. All servers run Windows Server 2008 R2.

Each office contains three domain controllers. Each office is configured as an Active Directory site.

System Center 2012 Infrastructure

Contoso has a System Center 2012 infrastructure that contains 11 servers. The servers are configured as shown in the following table.

---

Contoso has a private cloud named Cloud1. Cloud1 is managed by using VMM. The

following applications run in Cloud 1:

Microsoft Exchange Server 2010

Microsoft SharePoint Server 2010

A custom manufacturing application named Appl

The Hyper-V hosts are managed by using VMM. TOR-H01 and TOR-H02 are nodes in a failover cluster.

The switches that are part of the network fabric are from various manufacturers and are managed by using SNMPv3.

## App1

An application named App1 is deployed from a VMM service template that consists of one front-end web server and one back-end database server. App1 processes credit card information. The instance of App1 running in the data center uses two virtual machines named VM1 and VM2. TOR-H01 hosts VM1 and VM2.

App1 is managed by using a custom management pack named MP1. The management pack used to monitor App1 contains a distributed application diagram named App1DAD.

The service level agreement (SLA) for App1 states that App1 must be available 99 percent of the time.

## Problem Statements

Contoso identifies the following issues:

- Currently, all Operations Manager alerts are sent by email only. Database administrators require alerts to be sent by text message. The cell phone numbers of the database administrators are already configured in Operations Manager.
- Administrators report that the processor performance counters for the Hyper-V hosts display values that are lower than the actual load on the hosts.

## Requirements

### Business Goals

Contoso wants to minimize hardware and software costs, whenever possible.

### Planned Changes

Contoso plans to add a new web server to the App1 service template. Traffic to the new web server will be load balanced with the existing web server by using a hardware load balancer.

### Technical Requirements

Contoso identifies the following technical requirements for the planned deployment:

- Automatically apply software updates issued by Microsoft to all of the Hyper-V hosts.
- 

Automatically assign incidents to administrators when a Configuration Manager service fails.

- Ensure that the Exchange Server administrators can request that new virtual machines be added to the Exchange Server organization by using Internet Explorer.

- Monitor the uptime of all the Hyper-V hosts and all the virtual machines by using Operations Manager and VMM.

Performance and Resource Optimization (PRO) enabled management packs will be used.

- Ensure that users have a self-service portal that provides them with the ability to back up individual virtual machines. Users must receive an email message confirming that the backup is complete.

- Ensure that database administrators are alerted by a text message when an error occurs on a server that they manage. The text messages should be delivered regardless of the current network conditions.

- Network administrators report that they currently use different tools to monitor the port status on the switches. The network administrators want to manage all of the switches by

using Operations Manager.

#### Appl Requirements

Contoso identifies the following requirements for Appl: -  
Create an object in the Appl management pack to track the SLA.  
- Ensure that multiple monitoring thresholds can be used for different instances of Appl. - Ensure that Appl complies with the Payment Card Industry Data Security Standard (PCI DSS).

#### **NEW QUESTION: 4**

You have an offline virtual hard disk (VHD) that contains a generalized installation of Windows 7 Ultimate.

You need to disable the built-in games in the VHD.

You must achieve this goal by using the minimum amount of administrative effort.

What should you do?

- A.** Create an answer file that has InboxGames disabled. On a computer that runs Windows 7, attach the VHD. Run Pkgmgr.exe and specify the /uu parameter.
- B.** Start a computer from the VHD. Run Ocsetup.exe and specify the /uninstall parameter. Recapture the VHD.
- C.** Start a computer from the VHD. From Programs and Features, turn off the Games feature and then recapture the VHD.
- D.** Create an answer file that has InboxGames disabled. On a computer that runs Windows 7, attach the VHD. Run Dism.exe and specify the /apply-unattend parameter.

**Answer: D**

Explanation:

Dism

Deployment Image Servicing and Management (DISM) is a command-line tool used to service Windows images offline before deployment. You can use it to install, uninstall, configure, and update Windows features, packages, drivers, and international settings. Subsets of the DISM servicing commands are also available for servicing a running operating system.

/Apply-Unattend

Applies an unattend.xml file to an image.

If you are updating device drivers using an unattended answer file, you must apply the answer file to an offline image and specify the settings in the offlineServicing configuration pass.

If you are updating packages or other settings using an unattended answer file, you can apply the answer file to an offline or online image. Specify the settings in the offlineServicing configuration pass.
