NEW QUESTION: 1

Windows 10, <500, Microsoft Office 365 ProPlus, Answer: Explanation: Explanation: Box 1: When the installation is complete, all users will be prompted to install several updates. In the configuration file, the Updates Enabled element is set to True. This means that Office will check for updates after the installation. The Channel element set to Broad means that all semi-annual channel updates will be installed. Box 2: Office 365 ProPlus will be installed only on the computers that run a 64-bit version of Windows 10. The OfficeClientEdition element defines whether the 32-bit or

64-bit edition of Office 365 ProPlus is downloaded or installed. In the configuration file, it is set to '64'. The 64-bit version will only install on a 64-bit client computer. Reference: <https://docs.microsoft.com/en-us/deployoffice/configuration-options-for-the-office-2016-deployment-tool>

NEW QUESTION: 2

Scenario: External partners must use their own credentials and authenticate with their organization's identity management solution. Azure Active Directory (Azure AD) business-to-business (B2B) collaboration lets you securely share your company's applications and services with guest users from any other organization, while maintaining control over your own corporate data. Work safely and securely with external partners, large or small, even if they don't have Azure AD or an IT department. A simple invitation and redemption process lets partners use their own credentials to access your company's resources. Developers can use Azure AD business-to-business APIs to customize the invitation process or write applications like self-service sign-up portals.

Box 1: B2B Scenario: External partners must use their own credentials and authenticate with their organization's identity management solution. Azure Active Directory (Azure AD) business-to-business (B2B) collaboration lets you securely share your company's applications and services with guest users from any other organization, while maintaining control over your own corporate data. Work safely and securely with external partners, large or small, even if they don't have Azure AD or an IT department. A simple invitation and redemption process lets partners use their own credentials to access your company's resources. Developers can use Azure AD business-to-business APIs to customize the invitation process or write applications like self-service sign-up portals.

Box 2: Access Review Scenario: External partner logins must be audited monthly for application use by a user account administrator to maintain company compliance. Azure Active Directory (Azure AD) Access Reviews enable organizations to efficiently manage group memberships, access to enterprise applications, and role assignments. Administrators can use Azure Active Directory (Azure AD) to create an access review for group members or users assigned to an application. Azure AD automatically sends reviewers an email that prompts them to review access.
