NEW QUESTION: 1

An administrator is managing authentication namespaces and needs to delete a namespace.

Which statement is true?

- A.** To recreate a namespace that was previously deleted in IBM Cognos Configuration, a unique ID must be used.
- B.** After a namespace has been deleted in IBM Cognos Configuration, it no longer appears in the directory tool.
- C.** If a namespace is deleted in IBM Cognos Configuration and is no longer required, any authenticated member of the namespace can delete it permanently in the directory tool.
- D.** An inactive namespace in the directory tool is one that was

configured, but later deleted in IBM Cognos Configuration.

Answer: C

Explanation:

When you delete a namespace, you can no longer log on to the namespace. Security data for the namespace remains in Content Manager until you permanently delete it in the portal.
