**NEW QUESTION: 1**Company policy requires employees to change their passwords every 60 days. The security manager has verified all systems are configured to expire passwords after 60 days. Despite the policy and technical configuration, weekly password audits suggest that some employees have had the same weak passwords in place longer than 60 days. Which of the following password parameters is MOST likely misconfigured?**A.** Complexity**B.** Length**C.** Maximum lifetime**D.** Minimum lifetime

**Answer: A**

**NEW QUESTION: 2**Which three statements must be true before transporting a tablespace from a database on one platform to a database on another platform? (Choose three.)**A.** Both source and target database must be the same character set**B.** All read-only and offline data files that belong to the tablespace to be transported must be platform aware.**C.** The minimum compatibility level for both the source and target database must be 10.0.0.**D.** Both source and target database must have the same endian format**E.** The COMPATIBLE parameter must be the same in the source and target databases.**Answer: A,C,D**

**NEW QUESTION: 3**A user has scheduled the maintenance window of an RDS DB on Monday at 3 AM. Which of the below mentioned events may force to take the DB instance offline during the maintenance window?**A.** Security patching**B.** DB password change**C.** Making the DB Multi AZ**D.** Enabling Read Replica**Answer: A**  
Explanation:Explanation/Reference:Explanation:Amazon RDS

performs maintenance on the DB instance during a user-definable maintenance window. The system may be offline or experience lower performance during that window. The only maintenance events that may require RDS to make the DB instance offline are: Scaling compute operations Software patching. Required software patching is automatically scheduled only for patches that are security and durability related. Such patching occurs infrequently (typically once every few months) and seldom requires more than a fraction of the maintenance window.

**NEW QUESTION:** 4Your network consists of an Active Directory domain and 100 computers that run Windows 7. The domain contains a logon script named logon.cmd. You plan to deploy a new application named appl.msi by using the logon script. Appl.msi is stored in \\server1\share1. You need to modify the logon script to deploy the application. What should you include in the logon script?  
**A.** Sbdinst.exe -u \\server1\share1\appl.msi -q  
**B.** Msiexec.exe /i \\server1\share1\appl.msi /quiet  
**C.** Pkgmgr.exe /ip /m:\\server1\share1\appl.msi  
**D.** Msinfo32.exe \\server1\share1\appl.msi  
**Answer: B**  
**Explanation:** Msiexec Provides the means to install, modify, and perform operations on Windows Installer from the command line. Syntax msiexec /i {package|ProductCode} /i: installs or configures a product. NOT Msinfo32 Displays a comprehensive view of your hardware, system components, and software environment.
