Answer: B

NEW QUESTION: 3

Universal Containers is a Salesforce Service

Cloud provider. The company has a large number of users who are using the system. The company is looking for a way to improve the user experience. The company is considering the following options:

A. Implement a single sign-on solution. This will allow users to access the system using a single set of credentials. This will improve the user experience by reducing the number of passwords that users need to remember.

B. Implement a multi-factor authentication solution. This will require users to provide a second form of authentication, such as a text message or a security token, in addition to their password. This will improve the security of the system.

C. Implement a password manager. This will allow users to store and retrieve their passwords securely. This will improve the user experience by reducing the number of passwords that users need to remember.

D. Implement a user interface redesign. This will improve the user experience by making the system easier to use. This will also improve the productivity of the users.

E. Implement a data backup solution. This will ensure that the company's data is protected in the event of a disaster. This will improve the company's disaster recovery capabilities.

F. Implement a data archiving solution. This will allow the company to store its data for a long period of time. This will improve the company's data retention capabilities.

G. Implement a data migration solution. This will allow the company to move its data from one system to another. This will improve the company's data portability capabilities.

H. Implement a data synchronization solution. This will allow the company to keep its data consistent across multiple systems. This will improve the company's data consistency capabilities.

I. Implement a data security solution. This will protect the company's data from unauthorized access. This will improve the company's data security capabilities.

J. Implement a data backup and recovery solution. This will ensure that the company's data is protected and can be recovered in the event of a disaster. This will improve the company's disaster recovery capabilities.

K. Implement a data archiving and recovery solution. This will allow the company to store its data for a long period of time and recover it in the event of a disaster. This will improve the company's data retention and disaster recovery capabilities.

L. Implement a data migration and recovery solution. This will allow the company to move its data from one system to another and recover it in the event of a disaster. This will improve the company's data portability and disaster recovery capabilities.

M. Implement a data synchronization and recovery solution. This will allow the company to keep its data consistent across multiple systems and recover it in the event of a disaster. This will improve the company's data consistency and disaster recovery capabilities.

N. Implement a data security and recovery solution. This will protect the company's data from unauthorized access and recover it in the event of a disaster. This will improve the company's data security and disaster recovery capabilities.

O. Implement a data backup, archiving, migration, synchronization, security, and recovery solution. This will ensure that the company's data is protected, stored, moved, kept consistent, and recovered in the event of a disaster. This will improve the company's data protection, retention, portability, consistency, security, and disaster recovery capabilities.

Answer: A

NEW QUESTION: 4
