**NEW QUESTION: 2**

Your network contains an Active Directory forest named adatum.com. All domain controllers run Windows Server 2008 R2. The functional level of the domain and the forest is Windows Server 2008.

You deploy a new Active Directory forest named contoso.com. All domain controllers run Windows Server 2012 R2.

The functional level of the domain and the forest is Windows Server 2012 R2.

You establish a two-way, forest trust between the forests. Both networks contain member servers that run either Windows Server 2012 R2, Windows Server 2012, Windows Server 2008 R2 or Windows Server 2008.

You plan to use the Active Directory Migration Tool 3.2 (ADMT 3.2) to migrate user accounts from adatum.com to contoso.com. SID history will be used in contoso.com and passwords will be migrated by using a Password Export Server (PES).

You need to recommend which changes must be implemented to support the planned migration.

Which two changes should you recommend? Each correct answer presents part of the solution.

**A.** In the adatum.com forest, upgrade the functional level of the forest and the domain.

**B.** In the contoso.com forest, deploy a domain controller that runs Windows Server 2008 R2.

**C.** In the contoso.com forest, downgrade the functional level of the forest and the domain.

D. In the adatum.com forest, deploy a domain controller that runs Windows Server 2012 R2.

**Answer: B,C**

**NEW QUESTION: 3**

Your network contains an Active Directory domain named contoso.com. The domain contains two member servers named Server1 and Server2. All servers run Windows Server 2012 R2. Server1 and Server2 have the Network Load Balancing (NLB) feature installed. The servers are configured as nodes in an NLB cluster named Cluster1.

Port rules are configured for all clustered Applications. You need to ensure that Server2 handles all client requests to the cluster that are NOT covered by a port rule.

What should you configure?

- A. The cluster quorum settings
- B. A file server for general use
- C. The possible owner
- D. Affinity-Single
- E. The host priority
- F. The preferred owner
- G. The failover settings
- H. The Scale-Out File Server
- I. Quick migration
- J. Affinity-None
- K. Live migration
- L. The Handling priority

**Answer: E**
