To exam candidates who eager desirable outcomes, they are excellent JN0-362 guide torrent materials for your reference, Our JN0-362 study materials guarantee the pass rate from professional knowledge, services, and flexible plan settings.

Will you feel nervous for the exam?

NEW QUESTION: 1
You deploy a new database application to a SQL Server 2008 instance on a server that has 4 processor
cores and 64 GB of RAM. The application uses partitioned tables.
During testing, deadlocks occasionally occur on queries that are attempting to read data.
You find out that the deadlocks are related to the table partitions.
You need to ensure that the application executes without deadlocks for the read queries.
You also need to ensure that dirty reads do not occur.
What should you do? (More than one answer choice may achieve the goal. Select the BEST answer.)
A. Move each partitioned table to its own filegroup.
B. Disable partition-level lock escalation.
C. Move the clustered indexes for the partitioned tables to a separate filegroup.
D. Add additional database files to each partitioned table.
Answer: B
Explanation:
Explanation/Reference:
Full-recovery Model Description * Requires log backups.
-
No work is lost due to a lost or damaged data file.
* Can recover to an arbitrary point in time (for example, prior to application or user error).
Work loss exposure
* Normally none.
-
Il the tail ofthe log is damaged, changes since the most recent

log backup must be redone.
Recover to point in time ? S3.
-
Can recover to a specific point in time, assuming that your
backups are complete up to that
point in time.

NEW QUESTION: 2
Which of the following describes the organizational policies,
procedures, forms, and methodologies the business analyst is to
follow?
A. Matrix structure
B. Organizational process asset
C. Business need
D. Enterprise architecture
Answer: B
Explanation:
Explanation/Reference:
Organizational process assets describe the organizational
policies, procedures, forms, and methodologies the business
analyst is to follow.
C is incorrect. The business need describes business
requirements, solution scope, and solution
requirements.
B is incorrect. The enterprise architecture describes the
relationship among the organizational
units and how the organizational units act with one another.
D is incorrect. A matrix structure is not one of the three
inputs to the business analysis process.
