Answer:

Explanation:

Explanation

Step 1: ALTER DATABASE CURRENT SET COMPATIBILITY_LEVEL
Sets certain database behaviors to be compatible with the specified version of SQL Server.

Syntax:

```
ALTER DATABASE database_name  
SET COMPATIBILITY_LEVEL = { 150 | 140 | 130 | 120 | 110 | 100 |  
90 }
```

Step 2: UPDATE STATISTICS Customers

UPDATE STATISTICS updates query optimization statistics on a table or indexed view.

Step 3: EXEC sp_recompile N' 'Manage_customer'

sp_recompile causes stored procedures, triggers, and user-defined functions to be recompiled the next time that they are run. It does this by dropping the existing plan from the procedure cache forcing a new plan to be created the next time that the procedure or trigger is run
