However, it is easier to say so than to actually get the NCSE-Core certification, It is simple and suitable for browsing

learning and can be printed on papers to be convenient for you to take notes.

The Nutanix Certification NCSE-Core practice test content is very easy and simple to understand, Here are several advantages about our Nutanix Certified Systems Engineer-Core (NCSE-Core) exam practice demo for your reference.

The learners may come from many social positions and their abilities to master our NCSE-Core study materials are varied, PDF, APP and Software, each version has its advantage, and each version is the most effect way.

100% Pass Quiz 2023 Nutanix NCSE-Core " Trustable Dumps Discount

The result is that nowhere it is so easy to pass NCSE-Core than it is with your true ally " Superwszywka, Because we never stop improve our NCSE-Core practice guide, and the most important reason is that we want to be responsible for our customers.

You can totally rely on our study materials to pass the exam, Our NCSE-Core exam torrent is waiting for you to buy, We are focused on offering the most comprehensive NCSE-Core study materials which cover all official tests.

Therefore, just contact us if you have the confusions about the NCSE-Core study materials, Here, we provide the NCSE-Core learning materials: Nutanix Certified Systems Engineer-Core (NCSE-Core) of great reputation and credibility over the development of ten years for you with our NCSE-Core questions and answers.

You are worried about the whole process about the examination.

#### **NEW QUESTION: 1**

Your network contains an Active Directory domain named contoso.com. The domain contains two member servers named Server1 and Server2. All servers run Windows Server 2012 R2. Server1 and Server2 are nodes in a Hyper-V cluster named Cluster1. Cluster1 hosts 10 virtual machines.

All of the virtual machines run Windows Server 2012 R2 and are members of the domain.

You need to ensure that the first time a service named Servicel fails on a virtual machine, the virtual machine is moved to a different node.

You configure Servicel to be monitored from Failover Cluster Manager.

What should you configure on the virtual machine?

- A. From the Recovery settings of Servicel, set the First failure recovery action to Restart the Service.
- B. From the General settings, modify the Service status.
- C. From the General settings, modify the Startup type.
- D. From the Recovery settings of Servicel, set the First

failure recovery action to Take No Action.

**Answer: D**

Explanation:

Explanation/Reference:

Explanation:

When a monitored service fails the Recovery features of the service will take action.

Example:

In this case for the first failure the service will be restarted by the Service Control Manager inside the guest operating system, if the service fails for a second time the service will again be restarted via guest operating system. In case of a third failure the Service Control Manager will take no action and the Cluster service running on the Hyper-V host will take over recovery actions.

Reference: How to configure VM Monitoring in Windows Server 2012

**NEW QUESTION: 2**

In which file are the audit events defined?

- A. /nas/audit/audit.rules
- B. /nas/etc/audit.rules
- C. /etc/audit/audit.rules
- D. /etc/auditd.conf

**Answer: C**

**NEW QUESTION: 3**

You are developing a .NET application that uses the HttpClient type to call an ASP.NET Web API application. The API call returns a list of customers in JSON format and logs the results.

The URI for the API call is in a variable named address.

You need to make the API call without blocking.

Which code segment should you use?

- A. Option D
- B. Option C
- C. Option A
- D. Option B

**Answer: C**

Explanation:

Explanation

Example:

```
// Create an HttpClient instance
11: HttpClient client = new HttpClient();
12:
13: // Send a request asynchronously continue when complete
14: client.GetAsync(_address).ContinueWith(
```

```
15: (requestTask) =>
16: {
17: // Get HTTP response from completed task.
18: HttpResponseMessage response = requestTask.Result;
19:
20: // Check that response was successful or throw exception
21: response.EnsureSuccessStatusCode();
22:
23: // Read response asynchronously as JsonValue and write out
top facts for each country
24:
response.Content.ReadAsAsync<JsonArray>().ContinueWith(
25: (readTask) =>
```
